***Allowable Subject Matter***

Claims 3, 4, 6-11 and 13-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art of record fails to teach applicant's claimed bisphosphine, process for producing said bisphosphine, complex comprising said bisphosphine and a process for producing aldehydes comprising hydroformylation by contacting with said bisphosphine complex. Applicant's arguments submitted 12/22/2005 and subsequent argumentation made clear on the record that the prior art cited does not fairly teach or disclose the presence of the two arylene groups in the linking group which differ in chemical characteristics of the prior art from the instant claims. Since the ligand is not fairly taught or suggested in the prior art, the complex formed and subsequent method of making and using said complex would not be inherent or obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
